EDUCATION

DigiPen Institute of Technology | Redmond, WA
B.S. in Computer Science & Game Design **May 2026**
Relevant Courses: Gameplay Programming, Game AI, Data Structures & Algorithms, Software Engineering, UI/UX Design, Computer Graphics
Bellevue College | Bellevue, WA
A.A. Fine Arts & Science **Aug 2022**
Relevant Courses: Photoshop using

TECHNICAL SKILLS

Programming Languages: C#, C++, Python
Engines: Unity (latest LTS), Custom C++ Engine, Unreal (4.3)
Gameplay Systems: Player movement, collision detection, physics interactions, camera control, UI systems
Game AI: Navigation & decision-making systems
Tools: Visual Studio, VS Code
Interpersonal Skills: Solution-oriented • Adaptable • Cross-disciplinary collaboration • Clear technical communication • Team-focused problem solving

PROJECTS

Spooky Runner | Gameplay Programmer — Sep 2025 – Present

2D Endless Runner | Action | Online Mobile Game

- Implemented core gameplay systems and responsive player interactions using Unity and C#
- Integrated online service functionality to support connected gameplay
- Debugged gameplay logic to improve stability and internet connection performance
- Designed and tuned particle effects to enhance player feedback

Chess no Mancy | Gameplay Programmer / Tools Developer — Sep 2024 – Apr 2025

3D Chess | Strategy | Card & Round

- Developed custom **Unity editor tools** enabling designers to manage gameplay data efficiently
- Implemented player instruction flow and UX improvements
- Designed and built menus using **Unity UI Toolkit**
- Collaborated with designers and system engineers to streamline workflow

Refraction | UI/UX Programmer — Jan 2024 – Apr 2024

2D Top down | Strategy | Puzzle

- Designed and implemented interactive menu systems using a custom C++ engine
- Improved usability and responsiveness through UI refinements
- Debugged interface logic to ensure smooth player navigation

Drive to Survive | Gameplay Programmer — Jan 2023 – May 2023

2D Top down | Racing| Driving Simulation

- Implemented vehicle **collision detection systems** improving gameplay realism
- Developed the in-game **audio system**, integrating sound effects to enhance player feedback and immersion
- Developed shop interface and contributed to in-game economy design
- Constructed menu scenes and improved UI flow

LEADERSHIP EXPERIENCE

DigiPen Institute of Technology | Producer | Remond

- Coordinated with team members to support development and maintain communication
- Collaborated on the production of a 2D top-down game using a custom engine
- Initiated the project idea and helped assemble a multidisciplinary team
- Contributed to completing the game while adapting to evolving goals and team needs
